dns.comfort.net PLUS – Online dictation for a networked workstation

Dictation

Authors work with speech recognition at one or more networked work stations. They dictate directly into a target application (e.g. MS Word) and the text is seen on the screen immediately.

Correction

Während des Diktats durch den Autor.

Your benefits

- **Improved accuracy of recognition**
  - **Optimal learning effect**
    All authors within a pool learn and share automatically new and deleted words as well as new and deleted macros
  - **Profile distribution** (alternatively automatically or manually)
  - **Vocabulary control** = review of new and deleted words at the end of each session
  - **Preliminary word list**

- **Security**
  - **Simple recovery** of the Dragon profile (backup administration)
  - **Word list** = Backup of new and deleted words (instantly available for e.g. Dragon-version changes or the creation of a new profile)
  - **Macro list** = Backup of new and deleted macros (instantly available for e.g. Dragon-version changes or the creation of a new profile)
  - **SonicPad®**
    - **Secure dictation** due to instant saving
    - **Correction by overtyping** without loss of audio data
    - **Flexible** und quick working with drafts

dns.comfort.net PLUS

dns.comfort – dictate with comfort

dns.comfort.net PLUS – Online dictation for a networked workstation

Dictation

- **Simplified operation**
  - **One-click start**
    Desktop shortcuts for different Dragon profiles
  - **Vocabulary maintenance** also outside of Dragon NaturallySpeaking
  - **Easy adding** of new words within a text
  - **Simplified import and export** of Dragon Profiles
  - **Simplified configuration** of Dragon options

- **Independent of manufacturer**
  Integration of professional dictation hardware of all common manufacturers for recording and dictation handling devices

- **Effective integration** of speech recognition into your patient or client information system (optional: with integration)

- **SpeechLock®**
  Dictation into a defined window (e.g. Word or SonicPad®) – working parallel with different applications
